Multiple Coating: Reducing Glare and Enhancing Transmittance

UNCOATING MULTI-COATING

Dual Illumination: With **10 BRIGHTNESS LEVELS** for day and night use, the clear and bright reticle performs so well that you rarely need to set it to the highest level, even in daylight.

10 | 9 | 8 | 7 | 6 | 5 | 4 | 3 | 2 | 1 | 0

Dot Move: Rotating in the direction of the 'U' arrow moves the dot **down**, which means the bullet impact point moves **up**.

Rotating in the direction of the 'R' arrow moves the dot **left**, meaning the bullet impact point shifts **right**.
